

Not a relaxer  
Not Formaldehyde  
Not Cysteine  
Not Glyoxylic Acid

### **What is it then?**

It is a new formula containing tannic acid found in the black wattle tree using nanotechnology. This is the latest technology in modern temporary smoothing systems. It works by releasing hydrogen and acts internally on the strand by creating an internal imbalance. With this imbalance it is possible to create a new shape by using heat and traction.

The beauty market is constantly evolving. Keeping at pace with the innovative beauty market, PRIME PRO PROFESSIONAL excels when it comes to technology, always seeking to differentiate its products and services. As a result, we present Bio Tanix Brazilian Keratin, the newest and most bold smoothing line available with only 2 easy steps! Bio Tanix is developed from the biodiversity of plants and minerals, with differences that help the professional hairdresser achieve perfect results every time in the execution of their service while keeping health and the well being of their clients as top priority.

Bio Tanix Technology is combined with Lotus and Keratin compounds, which repair signs of wear caused by pre-existing chemicals or natural wear. In addition, this technology aids in anti humidity action. Through this formulated combination, the hair is left smooth and disciplined. The client is left with salon hair day after day for up to 3 months.

Easy application with only two steps

### **ACTION**

Aids in freeing of cystine in the hair strand without any aggression the hair fiber by releasing hydrogen.

### **PROTECTION**

Technology extracted lotus leaf attached to the benefits of collagen. Smooth hair and treated without fading and without discomfort.

### **PREMIUM TAMER | ANTIFRIZZ CONDITIONER**

Bio Tanix Technology formula introduces a new alternative and revolutionary concept of temporary smoothing. It is a technology with internal action in acid pH. Combined with Lotus and Keratin, Bio Tanix smoothens without any damage to the hair fiber. Hair is left 100% straight with a simple and safe application. The effects leave the hair smooth with radiant glow.

### **PREMIUM PROTECTANT | PRE-BLOW OUT FLUID**

It is a capillary fluid restorer with thermal action protectant containing a base of Lotus, Keratin, and Collagen. In addition to acting as an antioxidant, its action helps lock in nutrients deposited into the fibers protecting the strands against the action of heat. It also helps facilitate the movement of the flat iron, reducing the drying time of the hair at the end of treatment. The result is healthy hair with natural elasticity.

**Bio Tanix Home Care** has been developed to maintain and extend the results of treatment, acting to protect against harmful day-to-day external aggressions, leaving hair restored, balanced, silky with intense shine. Its use is of utmost importance for the longevity of the treatment and also provides thermal-activated protection for hair. Consult with your Professional Hairdresser.
